

# Vegetable Garden Fine Motor Activity

---

*These printables are the property of Taming Little Monsters and are protected by copyright and intellectual property rights under international conventions. They are for personal use only and are not to be reproduced for commercial purposes.*

Included in this printable are 20 various vegetables.

To make a vegetable garden fine motor activity you will need to

1. Laminate this page
2. Cut out the vegetables below
3. Glue these vegetables onto the ends of craft sticks
4. cut slits into a tissue box, large enough for the craft sticks to be posted into.

To make this activity more enticing, decorate the tissue box with soil and grass to make it look more realistic. You can just use paint, or colored paper to add this extra element of detail.
